# ST Engineering at 50

*This year marks ST Engineering's 50th anniversary. Themed "Engineering with Passion", the year-long Golden Jubilee celebration underscores the Group's unwavering dedication to innovation and a passion to succeed, which it had demonstrated at every stage of its growth.*

Ms Ho Ching, Executive Director and CEO, Temasek Holdings, Mr Kwa Chong Seng, Chairman, ST Engineering and Mr Vincent Chong, President & CEO, ST Engineering at the launch of ST Engineering's 50th anniversary.

To celebrate its 50 years of achievements, various events and activities have been organised throughout the year. A commemorative event held on 26 January 2017 was graced by Guest-of-Honour, Ms Ho Ching, Executive Director and CEO of Temasek Holdings, and important guests, including former management and staff, business partners, and customers. Speaking at the event, Ms Ho Ching, who was ST Engineering's founding Chairman from 1997 to 2003, recalled the early days of the company. She paid tribute to the single-minded dedication of pioneering staff and cited efforts of former staff who had made a difference in the growth journey of the company.

Ms Ho Ching launched the auspicious start of the celebrations, and the lion dance troupe ushered in the Lunar New Year, with the unveiling of twin scrolls. Besides witnessing the sealing of time capsules that contained symbolic items representing the Group, the guests also enjoyed a special preview of its solutions and capabilities at the specially curated exhibition. Employees and partners will jointly participate in the other celebration activities held throughout the year, including a Charity Golf event and launch of a commemorative book.
